OCEANS GIANTS

The whales of Canada

Discover the intriguing mammals living in Canadian oceans. Come and meet the Beluga, the northern right whale, killer whale and blue whale, all endangered species. Let narwhals, humpback whales and dolphins reveal themselves! Our travelling exhibition shows an accurate picture of cetacean populations' health as well as all the efforts made and actions carried out in order to protect them. Skeletons, castings, scientific interviews, games and photographs allow us to find out more about these witnesses to the oceans' biodiversity. Castings, specimens, interpretive panels, posters, interactive computer activities, audio-visual presentations, photographs, multi-tasks activities, handbook and documents related to national curriculum.

Content (180m²)

A production of Musée du Fjord in partnership with GREMM. This exhibition has been made possible by the generous support of Museum Assistance Program, Ville de Saguenay and Ministère de la Culture et des Communications.
